What is SurePa

SuraPa provides caregiver functionality for patients who needs to be observed. The application has an emergency button to send the location of the patient to the caregiver. It keeps medicine names and usage frequencies to send notifications and collects medicine usage then creates the reports.

Get Notified

- When it is time to take pills
- When your patient takes or not takes his/her medicines

Data Tracking

- Record your medicine usage
- Record your blood sugar level
- See your data in weekly manner

Track Your Patient

- Know about your patient or the one you take care of, blood sugar and medicine usage.
